

Few people. Clear standards. AI does the rest.

AI-DRIVEN PRODUCTION · SOFTWARE · ADVERTISING · ARCHITECTURE

For 20 years Wivvies has delivered video, 3D drawings and software to European customers. Today we combine that experience with AI agents, and deliver results you can understand, maintain and build on.

2% → 80%

Share of real software issues an AI can solve on a standard benchmark, 2023 → 2025
SWE-BENCH

~7 months

How fast the length of tasks AI can complete on its own has doubled since 2019
METR, 2025

84%

Developers who use or plan to use AI tools in their work
STACK OVERFLOW, 2025

Software

- Database applications with a full API and MCP interface
- Web and mobile front ends
- System documentation and user manuals as PDF
- How-to videos

Advertising

- Brochures, flyers, product manuals and market reports
- Sales and how-to videos
- Landing pages
- Budgets and marketing plans
- In Danish, German, French and English

Architecture

- Interior and exterior renders
- Photomatching of renders into real photos
- Floorplans, facades, details and elevations
- Site plans for new sites

INDONESIA

Video for the internet

Before YouTube was invented.

INDONESIA

3D and drawings

Outsourcing for Danish architects.

GERMANY

Software company

Database applications for business.

BULGARIA, TODAY

AI-driven development

All three trades, with AI agents.

AI is not the problem. Missing standards are.

95%

of organisations got zero return from their generative AI pilots in 2025, mostly due to brittle workflows

MIT NANDA, 2025

45%

of coding tasks where AI models chose the insecure option, with no improvement over time

VERACODE, 2025

70%

of the value of AI comes from workflows, governance and people, not from the algorithm

BCG

Wivvies starts where most AI projects fail: with a well-defined target and standards the work lives within.

The Wivvies method

Standards first

Procedures and rules from 20 years of human workflows in three industries.

Predictable, not a black box

Known structures that we can debug at 3 AM, and that you can maintain.

Built for reuse

Naming and file standards mean assets are found and reused, not made twice.

You stay in control

Your administrators maintain tables, forms and automations, without a programmer.

Let's define your next project.
